Electricity Act 1989: Overhead Lines (Exemption)(England and Wales) Regulations 2009

It is proposed to undertake the following work that is considered to be exempted from the Electricity Act 1989 by falling within the Overhead Lines (Exemption)(England and Wales) Regulations 2009:

Particulars of proposed development to be completed by Applicant:

In order to provide a new three phase electricity supply to Westholme Caravan Park at Aysgarth it will be necessary to rebuild an existing section of single phase high voltage overhead line supported on wood poles to three phase working. The works will involve replacing the existing two wire overhead conductors for three overhead conductors. The section of line to be erected to three phase working is shown in the approximate position by means of a red line on the attached plan. It is proposed to amend the route of the line slightly and remove the section of overhead line shown as a yellow line on the plan. The works will require an additional pole to be erected in the line in the approximate position shown as a red dot on the plan. The blue line on the plan represents an existing section of high voltage line unaffected by the works.

The Council is requested to indicate that it has no objection to the work being carried out by returning two copies of this Form with the Certificate completed and signed.

Yours sincerely
