Design Principles

Change of use of non- residential building to housing. Development of Dales View Barn to an independent dwelling to be used for local occupancy.

It will allow a currently redundant, at risk barn to be sympathetically restored and maintained ensuring a positive outlook for all neighbours and other member of the community. It would be an independent dwelling to the main house.

There is no intention to alter the external character of the barn in any significant way

Policy Review

Relevant Planning policies

HDP3

B15 (06)

GP1 (06)

GP2 (06)

Application meets the core aims of the local plan for the national park;

Aim 2 of the local plan to seek to foster social and economic well being of the communities within the national park.

Aim 3 sustainable a development that meets the needs of the present without compromising the ability of future generations to meet there own needs

The application proposal adheres fully to all aspects of the General Design Policy (GP2)

The application is in part necessary due to the short fall of affordable accommodation highlighted in many housing plans. The housing strategy clearly states the need to provide housing opportunities to meet the needs of the local community preventing the out migration of young adults.

The application meets policy HDP3. Change of use of non residential buildings to housing. Sedbusk is listed as small settlements were the National Park will permit the change of use and conversation of traditional building. The three eligibility criteria have been met. The building and its curtilage has the capacity for conversation in accordance with Local Plan policy B15 (conversion of traditional buildings)

The housing strategy clearly defines as an objective to give priority to re use previously developed land including conversation of existing buildings.

This application clearly meets the objection of meeting a local family needs supporting a local business through a sustainable minimal impact development of a dilapidated existing building adhering to all requirements to maintain unique character and features of the area.

Site Appraisal

The application site is not visible from the road it is isolated within a walled court yard. It was originally part of farm outbuildings which are now redundant and no longer used for agricultural purposes. The house was the original farm house and the barns supported the farm. The character of the area will not be impacted by the development as there is no intention to alter the external features of the barn in any significant way.

The barn is capable of being accessed safely, and has adequate parking capacity to serve users via existing routes.

There will be no impact on neighbours in a negative way no existing windows or proposed new windows will over look neighbouring properties. There is no change to the existing structure so there will be no change to overshadowing, overbearing or loss of privacy to neighbouring properties

Use

The barn will provide self contained 2 bedroom accommodation for local occupancy. There is no current use for the barn, it is at risk of dilapidation however it has previously been used as accommodation having bathroom facilities already plumbed in

Amount

No new development is proposed. It is internal modification and external restoration to an existing barn. There is no impact to the density and quantity to the existing area

Layout

There is no change to existing building layouts routes or opens spaces. (Please see plans in the body of the application). There will be minimal change to external character, one full door way on the south elevation and two further door ways on the east elevation will be half blocked up forming windows. These features will not be visible from the road and only visible to the main house.

Scale

There are no new buildings proposed so therefore no impact on surroundings or skyline.

Landscaping

The barn is situated on stone flags to one side and chipped gravel to the other. There is no intention to use landscaping in any of the areas surrounding the barn. There will be no change to boundary treatment or the local character/image

Appearance

There will be no significant change to the architectural detail of the barn and it will retain its agricultural character and compatible features with other barns in the village. There will be a slight change to some door ways to create windows detailed in an earlier section.

The doors and windows will be wooden and where possible materials will be reused from the existing building. Old doorways will be glazed at the top and lathed at the bottom in the style of a old ledge and brace stable door. The main front door will be significantly comprised of glass to create the impression of an open barn door. To secure the structure and in line with recommendations from building structural survey report a steel frame will be designed and fitted internally and will not be visible externally. This will be carried out to current building regulations.

Access

The main parking area will be adjacent to the barn. It is a 5.7m x 12m space including the car port and area covered by the shed. The car port will be reused by one car space. Three other spaces will be created with the removal of the shed. This creates capacity for 4 spaces 5m x 2m. This will leave the pedestrian access between the barn and house clear at all times this in turn accommodates clear access to High dale House and Clematis cottage for refuse collection, oil delivery etc. It will also support the agricultural access rights for Sedbusk Farm although they are no longer used due to more suitable routes available in the Village.

There is no impact on sustainable transport and existing transport links. Please see the internal view of the barn to understand the flow of people through the building. There is no intention to change the method of access from the main house or from the road which already exists. The access is via a flagstone or gravelled court yard which will not change as

this is appropriate to the existing character. There will be no change to how the barn can be accessed by emergency services. Access to the barn will be through existing external routes which will be sympathetically restored with existing materials.
